

Welcome to the first K-Tube newsletter.

Maybe you've noticed K-Tube has been making a lot of changes lately. We're changing the way we do business, beginning with the introduction of K-Tube Direct, which gives you [instant access to stock tubing](#). We're also excited to tell you more about K-Tube Design and K-Tube Discover, which allow you to purchase tubing with [nonstock specifications](#) and partner with us to create new types of tubing with specific attributes to meet your needs.

As we offer you new services and change the look of our website, one thing remains the same: K-Tube is dedicated to [quality](#). We understand that the quality of your products depends on the quality of their components and the raw materials used to make those components. In the coming newsletters, in addition to offering you exclusive coupons and K-Tube news, we'll help you learn more about why the quality of K-Tube tubing is so important—why [stainless steel tubing](#) really is better direct from the source.

- Greg May, President
