

Restriction of Hazardous Substances (RoHS2) 10 Substances Amendment Directive Statement of Compliance

July 21, 2023

To Our Valued Customers:

K-Tube Technologies is a manufacturer and distributor of laser welded tubing, and thus, does not melt or produce any of the raw material used in our product. K-Tube Technologies does not knowingly add or expose these materials to any of the hazardous substances (lead, mercury, cadmium, hexavalent chromium, polybrominated biphenyls (PBB), polybrominated diphenyl ether (PBDE), bis(2-ethylhexyl) phthalate (DEHP), butyl benzyl phthalate (BBP), dibutyl phthalate (DBP), Diisobutyl phthalate (DIBP) listed within the EU RoHS Directive.

As cited in statements from our vendors, the materials sold by K-Tube Technologies do not exceed allowed levels of these substances, and therefore, the materials are compliant with the European Union Directive 2011/65/EU (RoHS2) 10 Substances Amendment Directive 2015 / 863.

RoHS is under directive 2011/65/EU, and we're still under RoHS2. Sometimes, you see in the literature what we're talking about RoHS3, but in reality, we are under RoHS2. RoHS three refers to one of the main amendments which is the amendment 2015/863, but in reality, this is RoHS2, RoHS recast.

If you have any questions, please feel free to contact me.

Respectfully Submitted,
Rocky Giddens

Environmental and Safety Coordinator
