

Nitrosamine Statement of Compliance

October 24, 2024

To Our Valued Customers:

K-Tube Technologies is a manufacturer and distributor of laser welded tubing, and thus, does not melt or produce any of the raw material used in our product.

Nitrosamines are organic compounds formed by a reaction between nitrates or nitrites and certain amines.

Our products made of stainless steel alloys are inorganic, and therefore do not form nitrosamines. We also do not add any ingredients during manufacturing that contain nitrosamines.

We therefore can declare our products are nitrosamine free.

If you have any questions, please feel free to contact me.

Respectfully Submitted,
Rocky Giddens
