

Registration, Evaluation, Authorization, and restriction of Chemicals (REACH) SVHC Statement of Compliance

May 28, 2026

Valued Customers:

K-Tube Technologies affirms that our tubing products are fully compliant with the European Union REACH Regulation (EC) No 1907/2006 obligations under Article 33 related to the presence of Substances of Very High Concern (SVHCs). This declaration is based on the most recent revision of the REACH Candidate List, published by the European Chemicals Agency (ECHA) on 4 February 2026, which includes 253 entries.

Our products are classified as "articles" under REACH, as they are manufactured with a specific shape and function and do not contain substances intended for release under normal or reasonably foreseeable conditions of use.

The stainless steel used in our tubing contains the following alloying elements:

- Nickel (CAS 7440-02-0): up to 10.5% w/w
- Cobalt (CAS 7440-48-4): up to 0.5% w/w

Neither substance is currently listed on the REACH Candidate List of SVHCs; therefore, no Article 33 disclosure obligations are triggered for our products.

We rely on certifications from upstream material suppliers confirming REACH compliance and monitoring of SVHC thresholds. However, based on our final product composition, we acknowledge and fulfill our responsibility to declare SVHCs in accordance with REACH requirements.
